

Midwest Central Railroad
Memorandum

TO: Shift Supervisor, Main Yard
FROM: CB, Superintendent
RE: Train Orders

As outlined below, assign the following crews and tasks. Please refer to the attached Form 19 train orders 41-44 for complete details on each assignment.

Using Dave in engine 9802, pick up sixteen empty cattle cars from track 11. Load eight of these cars at Mesa Valley ranch and eight at Crown Ranch. Deliver the cars to Armour Meatpacking, unload them and return to the yard. Train order #41.

Using Sean in engine 9801, pick up two boxcars of auto parts from track 9, seven cars of lumber from track eight and six cars of woodchips from track 2. Take these cars to Huntersville. Unload the lumber and woodchips, and set out the boxcars of auto parts. Train order #42.

At approximately 1015 a BNSF train with loaded tank cars will arrive in the yard. Expect fifteen cars of aviation fuel and ten cars of petrol fuel.

Using Eric in engine 9821, pick up the petrol fuel and seven flatcars of IKEA pallets. Deliver these cars to Caldwell, unload, and continue on to Westfield. See train order #43.

Using Vaughan in engine 9822, pick up the aviation fuel and unload it at McPherson Naval Air Station before returning to the yard. See train order #44.

Once these tasks are underway, take control of the BNSF locomotive and proceed to the turntable. Face the engine back to the west and park it at the west end of track 11. When Vaughan returns with the empty tank cars, attach the BNSF loco to them and send the train back to Junction City.

CB, Supt.
