Train Order Number: 46

To Engineer: Andrew at Westfield Portal

Operate Amtrak Train 18, Engine ATSF 18, The Super Chief, from: MP 34.4 to East Shelton per this schedule:

MP 34.4	Leave 34.4 0900
Caldwell Station	Arrive 0910 Leave 0913
Garfield Station	Arrive 0924 Leave 0927
Huntersville Station	Arrive 0933 Leave 0936
East Shelton Portal	Enter 0942

Special Instructions:

Amtrak #18 will operate with class 1 privileges and all extra train crews have been reminded to yield the main line to your train and to restore all main line switches to normal. The eastbound yard bypass switch will be set to divert trains around the yard.

Westbound trains have been ordered not to enter a station which #18 is approaching or is stopped at. This will facilitate rail fan safety and photography.

You may encounter some approach aspects as leading trains will continue to the next available siding to clear the line.

When stopping at stations be sure that your last car clears signals and crossovers at the west end of the platforms (Garfield and Huntersville). This will allow following trains to approach the stations while you are stopped.
